

## LAB FOR SESSION 4

### Add student page:

```
<!DOCTYPE html>
<html>
<head>
    <title>Student List</title>
</head>
<body>
    <?php
    if(isset($_POST['btnAdd']))
    {
        //Get data from student form
        $Rollno = $_POST['Rollno'];
        $Sname = $_POST['Sname'];
        $Address = $_POST['Address'];
        $Email = $_POST['Email'];
        if($Rollno=="" || $Sname=="" || $Address=="" || $Email=="")
        {
            echo "(*) is not empty";
        }
    }
    else
    {
        //Creating connect to database
        $conn = mysqli_connect('localhost','root','','College')
        or die("Cannot connect database".mysqli_connect_error());
        //Retrieving data from table
        $sql = "select Rollno from Student where Rollno='$Rollno'";
        //Executing query.
        $result = mysqli_query($conn,$sql);
        //Testing exist data and then insert into table
        if(mysqli_num_rows($result)==0)
        {
            $sql = "Insert into Student values('$Rollno','$Sname','$Address','$Email')";
            mysqli_query($conn,$sql);
            echo '<meta http-equiv="refresh" content="0; URL=StudentList.php"/>';
        }
        else
        {
            echo "Existed student in list";
        }
    }
}
?>
```

```
<form method="post" id="AddStudent">
